

ALBION

FIRE AND SECURITY

**LONDON'S LEADING
FIRE & SECURITY SPECIALIST**

ABOUT US

Albion Fire & Security is London's leading independent fire and security service provider.

We are a customer focused company with over twenty years experience and a reputation for delivering the highest level of service and value for money.

Our clients include many of the UK's largest building owners and occupiers, as well as leading design consultants and contracting companies.

SERVICES

We offer a comprehensive range of services that includes;

System Design

We have designed and specified fire & security systems for many major institutions and companies, as well as myriad smaller concerns. All projects are headed by extremely competent engineers who have an extensive background developing innovative design schemes that combine technical proficiency and system functionality with flexibility.

System Installation

We have a wealth of experience in carrying out works to the most exacting specifications and standards, from hospitals and heritage buildings, distribution warehouses, department stores and manufacturing facilities to hotels. We can undertake a wide variety and scale of contracts ranging from £1,000 to £1 Million.

Commissioning

Our Commissioning Engineers are equipped with the latest authenticated versions of the manufacturers programming software, and using laptop or hand held PDAs are trained and competent to programme the system, conduct tests and finally commission and certificate the system.

Maintenance

Any business that has a fire alarm system needs to keep it functional and without faults. No matter how well designed and installed, even the most effective fire protection and security systems will deteriorate over time without regular, scheduled maintenance. Our preventative approach to servicing is unrivalled in the industry.

FIRE SYSTEMS

We offer a comprehensive range of fire detection and alarm services that are based on Open Protocol solutions, enabling total flexibility.

Carefully matching technology to application, we offer a full range of monitoring, detection and extinguishing systems. Albion Fire & Security operate in accordance with BAFE Scheme Document SP203 and BS5839: Part 1:2002 and hold BS EN ISO 9001:2008 Quality Assurance Standard.

Fire Alarm Systems

Fire Alarm Weekly Testing

Fire Safety Training

Fire Doors

Wireless Fire Alarm

Fire Extinguishers

Fire Suppression

Emergency Lighting

SECURITY SYSTEMS

Intruder Alarm Systems

We are highly experienced in the provision of multi site, intruder maintenance contracts, with the expertise to integrate intruder systems with related smoke cloak, panic alarms, hold up alarms, asset tagging and CCTV systems.

Access Control Systems

From a keypad to fingerprint readers, from microchip tags to state of the art turnstiles, Albion can arm our clients with all manner of systems. Access control and door entry systems not only provide building management control, they can be used to monitor loss prevention and also time and attendance of staff and visitors.

CCTV

We offer expert design, camera selection, installation and maintenance to ensure that when an incident occurs, it is captured on CCTV and is suitably recorded for further analysis. We operate in accordance with NCP 104 (NSI Code of Practice) and NACP 20 relating to BS EN 50132 and hold BS EN ISO 9001:2008 Quality Assurance Standard.
